

Optibase Enterprise Video Solutions: Now NETCOM-Certified

Optibase IPTV solutions for situational awareness, decision support and full motion video management, the most robust, secure and reliable solutions on the market today, are now certified as networkworthy by the U.S. Army Network Enterprise Technology Command (NETCOM). The certification of networkworthiness (CoN) signifies that Optibase's products fully comply with rigorous Army Enterprise Infrastructure standards for security, supportability, sustainability and compatibility.

Optibase multi-format IPTV encoding and streaming platforms and integrated tactical system for full motion video management are deployed around the globe by the most professional military organizations and commercial enterprises in the world. In extreme conditions, they flawlessly and securely provide reliable, high-quality video intelligence to command centers and field units. They enable live and recorded video assets to be viewed in real time and quickly processed and exploited to create actionable, reliable intelligence.

In commercial and civilian applications, the same high standards that make Optibase products secure, easy to use and robust enough for military use make them reliable, high-performance solutions that are easy to integrate with existing IT and have low operating costs. Technologically advanced and savvy enterprises and organizations leverage Optibase solutions to provide instant, highly usable content, intelligence and connectivity across offices, campuses and installations.

Solutions for Informed Decision Making and Fast Response

Whether your organization is operating in the heat of the battlefield, under the pressure of round-the-clock production or in a high-touch service environment, you need instant information that enables immediate response to dynamic situations before they can get out of hand. Optibase state-of-the-art high definition (HD) and standard definition (SD) video streaming platforms and innovative management and viewing applications allow enterprises to stay informed and respond quickly, around the clock and from around the world.

Real Time Sharing of Live, Accurate Video

Using the browser-based EZ TV management interface and IPTV player, Optibase decision support systems (DSS) deliver real-time footage for viewing on standard TVs or PCs without any installation. Single feed or concurrent displays of 4, 9 or 16 feeds in a mosaic view allow on-going action to be monitored from various angles and perspectives ensure that no development goes unnoticed. Optibase products support the most advanced video formats, including MPEG-2, MPEG-4, H.264, and Adobe® Flash®.

Optibase CoN-Certified
Products and Solutions

- EZ TV IPTV System
- FITIS™ FMV Solution

High performance and Reliability for Mission Critical Applications

Optibase professional encoders suit the full range of deployment requirements. The MGW line of encoders provides encoding of multiple channels in one location, as well as a highly portable, rugged, professional grade H.264 encoder that operates under extreme temperatures and toughest conditions.

Integrated Tactical Solution for Full Motion Video Management

Today, efficient and timely management of the vast video resources being collected, and its transformation into relevant situational intelligence, pose a huge challenge in both the military and commercial arenas. The Optibase Fully Integrated Tactical IPTV System (FITIS) captures, stores and manages video and data from remote sources, and provides playback, sorting and retrieval of video assets via multiple network configurations.

About the U.S. Army Certificate of Networthiness

Certificate of Networthiness (CoN) is issued by the U.S. Army Network Enterprise Technology Command (NETCOM). The CoN is a requirement for all enterprise software products in the Army Enterprise Infrastructure Network. The CoN certification signifies that Optibase is in full compliance with the Army Enterprise Infrastructure's strict standards for security, supportability, sustainability, and compatibility. In addition to the U.S. Army, the certification applies to all National Guard, Army Reserve, and Department of Defense organizations that use the Army Enterprise Infrastructure Network.

About Optibase

Optibase, a Vitec company, provides video compression and streaming solutions, specializing in video encoding, decoding, streaming and distribution of live and on-demand video for federal and state government agencies, enterprise organizations and the world's leading Telco and broadcast service providers. With a collection of innovative, professional-grade products, Optibase enables its customers to take full advantage of video distribution over their IP network, ensuring superb video quality in a scale of bit-rates for simple and effective video streaming to desktops, set-top-boxes and on-demand applications.
